- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

Дополнительная информация

- 1.
- 2.

Коротко о главном...

- Поиск среди статей из 21,500+ журналов (~ 6,300 по медицине) и 25 млн. патентов
- Анализ найденных статей по цитированию (данные с 1996 по н.в., расширяется до 1970)
- Просмотр активности и цитируемости авторов (h-индекс)
- Сравнение журналов по библиометрическим показателям
- Отчеты о публикационной активности организаций
- Интеграция с ORCID, Mendeley и Altmetrics

Отбор журналов в Scopus

Content Selection & Advisory Board - 40 экспертов, 15 профильных комиссий.

Любой журнал в Scopus, как минимум, соответствует следующим критериям:

- рецензирование статей
- рефераты на английском
- регулярная публикация
- список источников на английском языке
- опубликованные редакционная политика и этические принципы

1. Поиск статей - основная страница

1. Поиск статей - правила синтаксиса

Операторы: AND, NOT, OR, W/, PRE/

Замены: \$ - поиск вариантов с отличием в 1 символ. * - отличие в любое количество символов.

Регистр: не учитывается.

Множественное число: не учитывается (показывает все варианты)

Греческие буквы: показывает в результатах α и **alpha**

British / American написания: для общепринятых вариантов возвращает оба написания (colour, color)

ПОИСК ФРАЗ:

- Несколько слов, разделенных пробелом, воспринимаются как соединенные AND.
- Кавычки определяют точность вплоть до множественного числа. Так, запрос «cancer cell» возвращает результаты с cancer cell и cancer cells.
- Фигурные скобки { } - поиск точного соответствия.

Подробная информация об использовании поисковых команд доступна на [.](#)

Immunology of atopic eczema: Overcoming the Th1/Th2 paradigm (Review)

Eyerich, K.^{ab}, Novak, N.^c

^a Department of Dermatology and Allergy, Technische Universität Munich, Biedersteiner Strasse 29, 808

^b ZAUM - Center of Allergy and Environment, Helmholtz Center, Technische Universität Munich, Munich

^c Department of Dermatology and Allergy, University of Bonn Medical Center, Bonn, Germany

Abstract

Atopic eczema (AE) is a challenge for modern medicine, because it is prevalent, severely affects quality of life of patients and their families, and causes high socioeconomic costs. The pathogenesis of AE is complex. While initial studies suggested a Th2 deviation as primary reason for the disease, numerous studies addressed a genetically predetermined impaired epidermal barrier as leading cause in a subgroup of patients. Recently, immune changes beyond the initial Th2 concept were defined in AE, with a role for cell subsets such as Th17 and Th22 cells. Furthermore, trigger factors are expanded from allergens to microbial products as well as self-antigens. This review pieces together these abnormalities into the pathogenesis mosaic of AE. © 2013 John Wiley & Sons A/S.

Scopus Feedback

Scopus Author Feedback Wizard

Use the Scopus Author Feedback Wizard to collect all your Scopus records in one unique author profile. To locate your documents as completely as possible, please provide all the name variants under which you have published. Once you have submitted the author profile the Scopus Author Feedback Team will process your request within 4 weeks.

❗ If you are unable to find a publication, if there is a problem with the citation count or you have additional feedback, contact the [Scopus help desk](#).
